Introducing  
THE SEALY  
POSTUREPEDIC  
**HYBRID  
COLLECTION**

A beautiful convergence of conforming visco-elastic foam comfort and the support of a Sealy Posturepedic SRx Titanium® spring system. This innovative combination delivers the orthopaedically correct support and conforming comfort your body needs to sleep in harmony.

**CONTOURING  
VISCO ELASTIC  
MEMORY FOAM**

Visco-elastic memory foam is a high quality material that hugs and conforms to the body to help provide pressure relief and minimise movement throughout the night.

**SEALY  
POSTUREPEDIC  
SRX<sup>II</sup> TITANIUM  
COIL**

The revolutionary Sealy Posturepedic SRx<sup>II</sup> coil provides two stages of support: first it provides initial conforming support, then it responds with the deep-down correct support your body needs. The alternating coil configuration adds lateral stability and is designed to reduce horizontal movement. Made from Titanium alloy, SRx<sup>II</sup> is strong, resilient and durable.

# INNOVATION IS AT OUR CORE

Sealy Posturepedic Hybrid is designed to provide refreshing, undisturbed and indulgent sleep.

For deeply restoring and relaxing sleep, Sealy Posturepedic Hybrid offers a truly unique experience. It combines innovative comfort layers with Sealy's trusted support and stylish, modern design. Features such as the technologically advanced SRx Titanium® coil, gel-infused visco-elastic foam, and smart textile fabric treatment all contribute to rejuvenating, uninterrupted sleep.

## 1. CORRECT SUPPORT

Sealy's unique **SRxII™ support system** is designed to sense your body's weight and motion and to respond with the deep-down support your body needs. The coils are arranged in alternating columns for maximum stability. Open coils allow for air to circulate as you move in bed.

Sealy Posturepedic  
**SRxII**

## 2. CONFORMS AND MOULDS

**Visco elastic memory foam** conforms and moulds to your body. To ensure a comfortable night's sleep, the foam helps to reduce pressure points and minimise tossing and turning throughout the night.

## 3. UNINTERRUPTED SLEEP

Sealy's unique **UniPhase™ comfort architecture** is designed to micro-conform to the body, providing a slow and smooth transition from comfort to support. It absorbs motion to reduce partner disturbance for peaceful sleep.

## 4. COMFORTABLE TEMPERATURE

**SmarTex® fabric** helps to regulate the sleep surface temperature as needed throughout the night. This clever treatment only activates if your body temperature starts to increase. SmarTex® wicks away moisture to enable it to rapidly evaporate, giving you a comfortable sleeping environment. Layers of premium foams conform and mould to your body, providing pressure-relieving conformance where you need it most.

## 5. MAXIMUM SLEEP SURFACE

Sealy's most innovative edge support system – **UniCased® XT** – provides greater stability and a seamless transition from one edge of the bed to the other, maximising your sleep surface. UniCased® edge support locks into the support system to provide a stable sleep surface and to help reduce motion transfer for a blissful night's sleep.

## SUPPORT YOU CAN TRUST

### AUSTRALIAN MADE AND OWNED

The Sealy Posturepedic you choose is made to order, in one of Sealy's five manufacturing centres. The Sealy Components Division produces the innerspring systems, fibre fills and foundations. Materials are primarily sourced from Australian Manufacturers.

### OUR 10 YEAR GUARANTEE

When you purchase a Sealy Posturepedic, you are choosing Australia's most trusted bedding brand. Each component is of the highest quality so you can enjoy your mattress for many years to come.

### SIZING INFORMATION

**King**  
1835mm wide x 2030mm long  
**Queen**  
1525mm wide x 2030mm long  
Sizes are nominal.

### NATA ACCREDITATION

The Sealy Research and Development Centre tests every component to stringent quality standards. Beds are required to perform to the highest durability and performance standards. Sealy's R&D centre is NATA accredited to comply with Australian Standards.

### ENVIRONMENTAL RESPONSIBILITY

Sealy recognises the importance of environmental sustainability. Our goal is to reach a balance between sustainability and product quality, performance and durability. Over 90% of materials in a Sealy Posturepedic bed are recyclable. Sealy uses plantation timber for foundations. Local manufacturing ensures the carbon footprint of each bed is minimised through fewer transport miles.
