SEALY-ALI-SPEC-7686
Reference Codes:
ATTENTION!
IMPORTANT SAFETY INSTRUCTIONS.
PLEASE READ THESE INSTRUCTIONS THOROUGHLY BEFORE USING THIS PRODUCT.

ELECTRICAL SAFETY
Always unplug this Adjustable Base from the electrical outlet before any cleaning or maintenance of the bed frame. To safely disconnect, make sure all controls are in the off position, then remove the plug from the outlet. Keep cord away from heated surfaces. Keep air openings free of lint, hair and the like — never operate when air openings are blocked. Never drop or insert any object into any opening. Use only indoors.

Cease use of this bed frame and contact a qualified service centre for repair if:
- It has a damaged cord or plug
- It is not working properly
- It has been dropped or damaged
- It has been dropped into water

NOTE:
Unauthorised modifications to this product could void the electrical portion of your warranty.

IN-HOME USE ONLY
This Adjustable Base is designed exclusively for in-home use.

HOSPITAL DISCLAIMER:
It is NOT designed for hospital use and is NOT designed to meet hospital standards. Do not use this bed with TENT TYPE oxygen therapy equipment or use near explosive gases.

IMPORTANT SAFETY FEATURES
Weight Fail Safe Feature — In the case that an overload of weight is placed on the head or foot mechanism, the control unit will automatically stop all functions. The control unit will automatically resume all functions 30 seconds after excess weight is removed.

NOTE:
This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

NOTE:
Children should be supervised to ensure that they do not play with the appliance.

WARRANTY WARNING!
This Adjustable Base is specifically designed to require no maintenance by you, the user. Any opening or tampering with the control box, motors or hand controls (with the exception of the battery compartment, if equipped) will result in a void of the warranty. Only those authorised may conduct repairs or part replacement on your Adjustable Base.

NOTE:
For optimal safety, it is recommended that your Adjustable Base is plugged into a surge protector (not supplied with this Adjustable Base).
CONSUMERS WITH PACEMAKERS

It is possible that the (optional) vibrating feature of this bed may be interpreted falsely by some pacemakers as movement and/or exercise. This is common with any product that produces a vibrating motion, and may or may not affect your pacemaker. Please consult your physician with any concerns.

PRODUCT RATINGS

Lift Motor Restrictions — The lift motors in this bed are NOT designed to operate continuously for more than 3 minutes over a 30 minute time period, or approximately 10% duty cycle. To ensure reliable functionality and full life of this product, do not attempt to exceed these limits.

Weight Restrictions — The recommended weight limits on our Adjustable Bases are:

- Single Extra long: 261kg
- Queen: 295kg

The structure of the bed will support the recommended weight when distributed evenly across the bed. **Maximum weight the bed can support per person is 113kg.**

The head and foot sections are not designed to individually support or lift this amount of weight. For optimal performance, entering and exiting the Adjustable Base with the bed in the flat or level position is recommended.

NOTE:

Attempting to circumvent or exceed this rating will shorten the life expectancy of the product and may void the warranty.

SMALL CHILDREN AND PETS WARNING

Immediately dispose of all packing materials as it can pose a smother risk to small children and pets. Injury could occur also if children or pets are permitted to play on or under the bed. Do not allow children to operate this bed without adult supervision.

SAVE THESE INSTRUCTIONS!

Proper operation of your Adjustable Base is necessary to ensure the long life and durability you expect from a high-quality product. The manufacturer has tested and inspected this product prior to shipment.

NOTE:

Exceeding the recommended weight restrictions could damage your Adjustable Base and void your warranty.
Parts List

Before discarding any packing materials, check the Adjustable Base carton and verify all items in the parts list are included.

(A) REMOTE CONTROL (1)

(B) MATTRESS RETAINER BRACKET (1)*

(C) BED LEG (4)

(D) 2 x AA BATTERIES, 2 x 9V BATTERIES

* Indicates part is attached to base for shipping purposes.
**Head Bracket Kit (sold separately)**

Installation Guide

**STEP 1**
For safety reasons, the following should be performed by 2 people. Carefully lift the bed frame unit out of the shipping carton with the top side facing downward.

**STEP 2: ASSEMBLE THE BED LEGS**
For this step, you will need 4 bed legs (C), which can be found in the accessories box. Turn each bed leg (C) in a clockwise direction into the threaded holes on the frame as shown. Repeat the bed leg assembly for all 4 legs (C) provided.

**STEP 3**
Remove power supply from packaging and plug power supply cord into the control box located on the underside of the base.

**DO NOT OVERTIGHTEN THE BED LEGS**

**STEP 4**
Take plastic wrapping off the base frame.

**STEP 5**
Carefully rotate the base frame over so the top side is facing upward.

**NOTE:**
Be careful not to rest the frame on its side. The weight may damage the legs.

**STEP 6**
Plug the power cord into a grounded electrical outlet and confirm that the green light is on.

**NOTE:**
For optimal safety, a surge protector should be used (not supplied with this Adjustable Base).

**STEP 7**
Install batteries in remote control.
Test all functions on the remote control to ensure all features are operational.
If the bed does not work, refer to Troubleshooting on page 12.

**STEP 8**
Return bed to flat or level position.

**STEP 9: ATTACHING THE ‘QUICK-SET’ MATTRESS RETAINER BRACKET**
Fasten the ‘Quick-Set’ mattress retainer bracket (B) to the foot of the bed base using the ‘Quick-Set’ slide method illustrated below. Simply position the open ends of the Retainer Bracket directly aligned with the ‘Loop’ Retainer Anchors already installed to the foot of the base surface. Slide the Retainer Bracket forward allowing the open ends to glide into the loop.

**NOTE:**
If a headboard is to be installed, owners who have purchased the optional Headboard Bracket Kit continue on to step 10. If the Adjustable Base is to be set up without a headboard, proceed to step 11.

**IMPORTANT!**
MAKE SURE POWER CORDS DO NOT OBSTRUCT ANY ADJUSTABLE BASE MECHANISMS.
IMPORTANT!

FAILURE TO FOLLOW THE INSTALLATION STEPS AS THEY APPEAR IN THIS GUIDE COULD RESULT IN DAMAGE TO YOUR ADJUSTABLE BASE.

MAKE SURE TO POSITION THE BOTTOM OF THE HEADBOARD CROSS MEMBER NO MORE THAN 76.2 MM BETWEEN THE HEADBOARD AND THE TOP OF THE MATTRESS.

STEP 10: ASSEMBLE THE HEADBOARD BRACKET

Use the hand control to elevate the head of the bed so the bed base frame is reachable.

A

Slide the inner headboard bracket (D) horizontally with the “C” opening facing down under the crossbar. Position the bracket (D) in the guide peg on the bottom of the crossbar. Insert a headboard bolt (G) fitted with a 8mm washer (I) through the pre-drilled hole in the crossbar and into the pre-drilled slotted hole in the “C” channel inner headboard bracket. Tighten in place with a 8mm washer (I) and 8mm nut (J). Repeat on the other side.

B

Place the open side of the outer headboard bracket (E) onto the exposed square tube of the inner headboard bracket (D) to create a tight fit between (D) and (E). Insert a retainer bolt (G) fitted with a 8mm washer (I) into the outer headboard bracket (E) and through the inner headboard bracket (D). Hand tighten using a 8mm washer (I) and a 8mm nut (J). (Leave loose enough for adjusting.) Repeat on the other side.

C

When headboard brackets are assembled, make sure there is a space of 38.1 to 50.8 mm between the edge of the bed base and the headboard brackets.

D

Securely fasten the headboard bolts (not included with your Adjustable Base) to the end of the headboard bracket assembly.

E

Measure the distance from the centre of one mounting hole in the headboard to the centre of the other.

F

Measure the distance from the center of one mounting hole in the headboard bracket assembly to the centre of the other.

G

If you need to adjust the headboard brackets, unscrew the bolts holding the outer headboard brackets and move them the necessary distance. Reinstall the bolts and securely tighten.

STEP 11

Place your mattress on the Adjustable Base surface. Installation is now complete.

If the bed comes with a programming option, turn to Programming the Remote Control on page 10 to proceed.
Using the Remote Control

**IMPORTANT!**
For your safety, read the owner’s manual carefully and completely before operating this product. Electric shock may occur if electrical components are not installed or operated according to these guidelines.

**UNDER BED LIGHT (A)**
Press the button to turn on or off the under bed light. (button on back of remote control)

**HEAD AND FOOT POSITION ADJUSTMENTS (B, C, D, E)**
Use to raise or lower the head and foot sections of your Adjustable Base. The premium “Wall-Glide” feature will automatically synchronize with all head and foot adjustments.

**BED “FLAT” BUTTON (F)**
Press down and hold for 3 seconds to return bed to the flat position.

**PRE-PROGRAMMED MEMORY POSITION (G)**
These 3 program function keys allow you to select the most popular positions with 1 touch.

**FULL BODY MASSAGE (H)**
Press to activate both the head and foot massages at the same time.

**HEAD AND FOOT MASSAGE ADJUSTMENTS (I, J, K, L)**
Use to activate the massage feature on the head and foot of the bed (starting at intensity 4 of 8). Gradually increase or decrease intensity of massage vibration by pressing the appropriate button. The lowest setting on each massage unit will turn off the respective vibration.
The massage feature is programmed with an Auto Shut-Off Timer that will automatically turn off the massage after 15 minutes of continuous use.

**STOP BUTTON (M)**
Hold down for 2 seconds to stop massage.

**NOTE:**
You must stop massage before alternating between massage functions.

**WAVE MASSAGE ADJUSTMENTS (N)**
Activates both units to wave mode massage.

**NOTE:**
You must stop the massage in order to activate another massage setting such as full body or another wave massage.

**REMOTE FEATURES**

**NOTE:**
The buttons are backlit, when a button is pressed, to aid in the visibility of the remote in low light environments.

**NOTE:**
The changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

**NOTE:**
This bed may show minor intermittent performance because of typical RF interference. This is normal in the operation of the bed, not a defect.

**SAFETY**

• It is not necessary to face the receiver to operate the remote control. Remote signal is best transmitted within 3 metres of the receiver.

• In the case that an overload of weight is placed on the head or foot mechanism, the control unit will automatically stop all functions. The control unit will automatically resume all functions 30 seconds after excess weight is removed.

• Massage motors will automatically shut off after running continuously for 15 minutes. All massage functions will be operational again after 5 minutes. Automatic Shut Off will occur after 15 minutes of continuous use.

• The input transformer voltage is AC240V 50HZ, the output voltage is DC24V 3A. In the case of a short-circuit, a fuse on the transformer will blow to protect the electrical equipment (Fuse: 1A~1.5A). Should this occur, you MUST seek professional assistance to replace the fuse. Call Customer Care at: 1300 130 221
Programming the Remote Control

**NOTE:**
Programming by the user is only needed on replacement remotes, or when controlling two bases from one remote control.

**STEP 1**
Insert batteries into the remote control (2 x AA batteries).

**STEP 2**
Make sure your Adjustable Base is plugged into a working grounded outlet or surge protector.

**STEP 3**
Illuminated. Hold down the “Learn” button for 3 seconds to initiate the RF learning mode.

**STEP 4**
The LED signature light will flash 3 times on the control box. This means the RF frequency code setting function has been activated.

**STEP 5**
Press any button on the remote control.

**STEP 6**
When the control box light flashes and then remains illuminated, the RF frequency code learning process is complete.

Follow steps 1 through 6 below to use the remote control with 1 power base. To use the remote control with 2 power bases, repeat the steps for the second power base using the same remote.

Note: There are two (2) Learn buttons:
1. Control Box
2. Power Supply
Either button can be used.
Lowering the Bed in a Power Outage

Your Adjustable Base is equipped with an emergency lowering feature. Follow the steps below in the event that your base is in the raised position during a power outage.

**STEP 1**
Locate and remove the 9 volt battery cover.

**STEP 2**
Install 2 alkaline 9 volt batteries

**STEP 3**
Replace the battery cover.

**STEP 4**
Press and hold down the learn button on the control box until bed is in the flat position.

**NOTE:**
The 2 alkaline 9 volt batteries are only rated for single use. Replace every 12 months and after emergency lowering.
Troubleshooting

In the event the Adjustable Base fails to operate, investigate the problems and possible solutions provided below.

REMOTE CONTROL LED ILLUMINATES AND APPEARS NORMAL, BUT WILL NOT OPERATE BED
1. Is the power cord plugged into a working and grounded electrical outlet?

NOTE:
A grounded, electrical surge protection device is recommended (not supplied).

2. Test outlet by plugging in an appliance you know works properly.
3. Check low amp fuse on the control box under bed. Replace fuse if blown.

NONE OF THE FUNCTIONS ON THE ADJUSTABLE BASE WILL OPERATE
1. Re-program the remote control (as indicated in the Manual provided with this product, for programming procedures).
2. Unplug the power cord. After 45 seconds, plug in to electrical outlet. This should reset the electronic components.
3. The home electrical circuit breaker may have been tripped. Reset circuit breaker if needed.
4. Check surge protection device or electrical outlet to insure working order. Test outlet by plugging in a known working appliance.
5. Check low amp fuse on control box under bed. Replace fuse if blown.

REMOTE CONTROL FUNCTION KEYS WILL NOT ILLUMINATE
1. Replace batteries in the remote control.
2. Check that batteries are installed properly.

HEAD OR FOOT SECTION FUNCTION KEY WILL ELEVATE BED, BUT WILL NOT RETURN TO THE HORIZONTAL (FLAT) POSITION
1. Your bed may be obstructed preventing smooth operation. Remove obstructions from around and under the bed.
2. Check that head section has clearance from headboard or wall.
3. Headboard may be too close the edge of the mattresses. Verify a 38 to 50 mm distance between headboard brackets and mattress. Adjust if required.

ACTIVATING HEAD OR FOOT LIFT FUNCTION CAUSES “PULSING” OR “STUTTERING” WHEN OPERATING FEATURE
1. Check batteries and installation in remote.
2. Assure that the function key is pressed directly and firmly.
3. Radio frequency interference from other remotes or electronic devices may be affecting normal operation.

MASSAGE MOTORS SEEM EXCESSIVELY LOUD DURING OPERATION
1. Hard surface flooring may cause added vibration. To correct, place carpet pieces or rubber furniture cups under each leg or castor of the bed.
2. Elevate the head or foot section a short distance (with the remote control) to realign the lift/lower mechanisms with the bed support platform.
3. Check that the bed is not in direct contact with a wall, nightstand, or other object that may cause vibration or noise.
4. If Adjustable Base is installed on top of a bed frame, check that the massage motors are not causing bed frame (or bed frame components) to vibrate or rattle.
5. Check that the headboard attachment hardware is tightened firmly (if used).
While using a split system, it is important to adhere to the following installation instructions. Proper use of the included tie straps will securely hold split King adjustable bases together.

**INSTALLATION INSTRUCTIONS FOR ADJUSTABLE BASE TIE STRAPS**

**WARNING:** For safety reasons, it is recommended that two people perform installation.

**STEP 1**
Complete the installation of two bases side-by-side according to the Complete Reference Guide provided with your foundation. It is recommended that the gap between bases be no more than 25mm.

**STEP 2**
Locate the two (2) looped straps (one (1) included with each split King base).

**STEP 3**
Start with one (1) strap at either the head or foot of the bed. While one installer carefully lifts the right side of the base, the other installer slips both the elastic and strap loops around the suspended right leg of the base. Carefully lower the base.

**NOTE:**
The elastic loop must be at top of strap when fitted around leg.

**STEP 4**
While one installer carefully lifts the left side of the base, the other installer slips the other side of the elastic and strap around the suspended left leg of the base. Carefully lower the base.

**NOTE:**
Elastic loop should be touching leg of base (not wrapped on top of strap).

**STEP 5**
With the elastic loop above the strap, slide both as high as they will go to the top of each leg. Place the elastic loop up and over the notch at the top of the leg.

**STEP 6**
Repeat steps 3-5 to install second strap at the other end of the bed.
IF YOU EXPERIENCE ANY TROUBLE WITH YOUR ADJUSTABLE BASE WITHIN THE WARRANTY PERIOD, PLEASE CONSULT THE TROUBLESHOOTING GUIDE PROVIDED WITH YOUR FRAME AND ONLINE (IF APPLICABLE). IF PROBLEMS PERSIST, PLEASE CALL.

THANK YOU AND ENJOY YOUR ADJUSTABLE BASE!
Warranty

ADJUSTABLE BASE:
10 YEAR WARRANTY

SEALY GUARANTEES THAT WE WILL, AT SEALY’S OPTION, REPLACE OR REPAIR THE PURCHASER’S SEALY® SYSTEM IF IT IS DEFECTIVE DUE TO FAULTY WORKMANSHIP OR MATERIALS, SUBJECT TO THE LIMITATIONS DESCRIBED IN THIS WARRANTY.

This warranty does not apply:
a) to any damage caused by the purchaser;
b) if there has been any unauthorized repair or replacement of the unit’s parts;
c) if the unit has been mishandled (whether in transit or by other means), subjected to physical or electrical abuse or misuse, or otherwise operated in any way inconsistent with the operation and maintenance procedures outlined in the Complete Reference Guide, this warranty, and any other applicable document published or approved by Sealy;
d) to damage to mattresses, fabric, cables, electrical cords or items supplied by Resellers;
e) if there has been any unnecessary service calls, including costs for in home service calls solely for the purpose of educating the consumer about the unit for finding an unsatisfactory power connection; and
f) if the recommended weight restrictions are not followed (Twin Long: Split/Dual CA King:260kg; Queen: 295kg), the warranty will be void.

Repairs to or replacement of the Sealy® system or its components under the terms of this limited warranty will apply to the original warranty period and will not serve to extend such period. The decision to repair or to replace defective parts under this warranty shall be made, or case to be made, by Sealy at its option and in its sole discretion.

SUBJECT TO THE AUSTRALIAN CONSUMER LAW, REPAIR OR REPLACEMENT SHALL BE THE SOLE REMEDY OF THE PURCHASER. THERE SHALL BE NO LIABILITY ON THE PART OF SEALY FOR ANY SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OR FOR ANY OTHER DAMAGE, CLAIM, OR LOSS NOT EXPRESSLY COVERED BY THE TERMS OF THIS WARRANTY. THIS LIMITED WARRANTY DOES NOT INCLUDE REIMBURSEMENT FOR INCONVENIENCE, REMOVAL, INSTALLATION, SETUP TIME, LOSS OF USE, SHIPPING, OR ANY OTHER COSTS OR EXPENSES. SEALY MAKES NO OTHER WARRANTY WHATSOEVER, EXPRESS OR IMPLIED, AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED BY SEALY AND EXCLUDED FROM THIS AGREEMENT.

Notwithstanding anything else contained in this warranty, our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Your Sealy adjustable base system is warranted against defects in the workmanship or materials for a period of ten (10) years from the warranty commencement date. Electronics, electrical components, drive motors and massage motors are included. Upon notice during the first year from the warranty commencement date, Sealy will send replacement parts (at no cost to the purchaser) for any defective part to the purchaser, and Sealy will pay all authorized labour and transportation costs associated with the repair or replacement of any parts Sealy determines to be defective. This ten (10) year warranty shall not apply if purchaser does not return any and all defective parts to Sealy within 15 days of purchaser’s receipt of replacement part. After the 10th year, the purchaser shall bear the entire cost of repair and replacement of all parts and materials, including labour and transportation.
IF YOU EXPERIENCE ANY TROUBLE WITH YOUR ADJUSTABLE BASE
WITHIN THE WARRANTY PERIOD, PLEASE CONSULT THE TROUBLESHOOTING
GUIDE PROVIDED WITH YOUR FRAME AND ONLINE (IF APPLICABLE).
